BRUSH TYPES

There are different types of brushes designed for different jobs, as well as different bristles for every type of job.

Winco offers the basic janitorial brushes every foodservice operation needs from the front to back of the house.

BRISTLE TYPES

Understanding bristle types and their typical applications will help make your decision easier and ensure that you are purchasing the best brush for any job.

Key factors to consider when shopping for a cleaning brush:

Recovery Strength

A bristle's ability to retain its original shape and rigidity, even after constant use.

Bristles with good recovery strength will have a longer useful life, and not break or splay out from the brush center.

Bristle Softness

The measure of how coarse bristles are to the touch.

Soft bristles are ideal for delicate surfaces to avoid scratching.

Hard bristles are useful for cutting through tough, stuck-on grease and grime.

BRISTLE TYPE	USES
WIRE  BR-10	<ul style="list-style-type: none"> • Cleaning Grout • Heavy Soil
NATURAL FIBER  BRP-10	<ul style="list-style-type: none"> • Heavy Floor Scrubbers • All-Purpose Scrubbing

FLOOR CARE

BROOMS

Brooms are one of the most basic but important tools in your janitorial arsenal, and they come in various forms to meet different needs.

SELECTING THE RIGHT BROOM

Determine the need:

- What type of floors do I have?
- Am I typically just sweeping up dust & debris?
- Are there tight spaces & corners that need cleaning?
- Do I need to sweep in wet areas, dry areas, or both?
- Are there oils, chemicals, or other compounds on my floors?

Find the right fit:

BRISTLE TYPES

FLAGGED

Bristles are frayed at the ends to help collect small particles. This type is ideal for lint and dust.

UNFLAGGED

Bristles are straight and stiff, better suited for collecting large debris in open areas.

	CLEANING TASK	ANGLED BROOM	PUSH BROOM	FLOOR SCRUBBER
TASK	Small Spaces	X		X
	Large Spaces	X	X	
	Small Debris	X		
	Large Debris		X

Keep your Brooms Clean

Brooms collect dirt and dust, and can become grimy.

To prevent spreading the dirt and grime around, regular cleaning of your broom is essential. Plus, your broom will clean more effectively if it's regularly maintained.

Stuck-on dirt, dust, and even hair can cling to the bristles. Make sure the debris is removed prior to the next time the broom is used.

Don't forget to wipe down your broom handle and dust pan too.

Designate a Broom for each Sweeping Job

There are many different types of sweeping jobs.

Consider designating a different broom for each of them to help prevent the potential spread of germs to different areas.

FLOOR CARE

MOPS

RATING OUR MOPS

Launderability

A mop head's ability to withstand being cleaned in a commercial washing machine. The better launderability, the more wash cycles it can go through before it begins to degrade.

Best Materials: Microfiber, Blend

Absorbency

The mop material's ability to absorb liquid, which translates into its ability to clean up spills and dry floors quickly and thoroughly.

Best Materials: Cotton, Blend

Release

The mop material's ability to release its liquid as it's mopped across floors or wrung out. Mop heads with good release can be wrung out thoroughly and are ideal for applying cleaning solutions, wax, and finishes to floors.

Best Materials: Microfiber, Blend

MOP TYPES

CUT-END

- Not launderable
- Frequent replacement
- Less coverage

LOOP-END - BANDED

- Launderable
- Long-lasting
- Superior coverage & performance

Wet Mops

WR-35

FLOOR MATS

FRONT & BACK
OF HOUSE

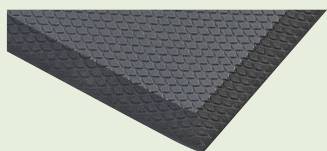

What type of mat(s) do you need?

Choosing the right mat is easier when you understand where it will be used and the features that will be most beneficial to each location.

Comfort

Thicker mats typically offer the most comfort.

1/2" thick mats are excellent for extended-use work stations.

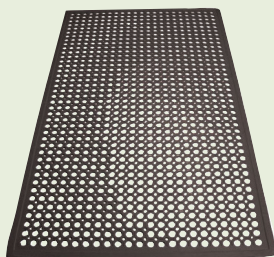

FMG-23K

Drainage

Drainage mats channel liquid away where there are frequent spills and standing water, keeping the work area dry and safe.

In dry work areas, a mat with moderate drainage is fine.

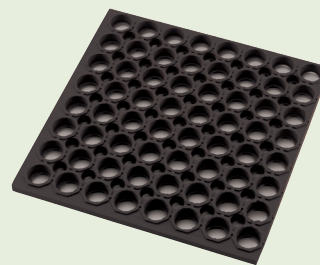

RBMH-35K

Anti-Slip

Designed to provide greater resistance to grease and oil.

Large drainage holes remove liquid and debris from your platform.

RBM-35K

EQUIPMENT CLEAN-UP

OVEN / GRILL / GRIDDLE
CLEANING

Cleaning is incredibly important in the foodservice industry for preventing cross-contamination and passing health-inspection - it is imperative that you clean your equipment regularly and thoroughly.

Effective Cleaning Options:

Oven & Grill Brushes

Wire brushes & stainless steel scrapers make for fast & easy removal of heavy deposits, rust, and burned-on food build-up.

Grill Bricks & Screens

Bricks remove residue without absorbing odor or grease.

The screen is ideal for hot grills to remove food particles and restore the shine.

GBH-2 & GBK-348

GSH-1 & GSN-4

Scratch Brushes

Compact for heavy scraping, and cleaning grease and food deposits in tight/narrow spaces.
